

National Weather Service Wilmington, NC

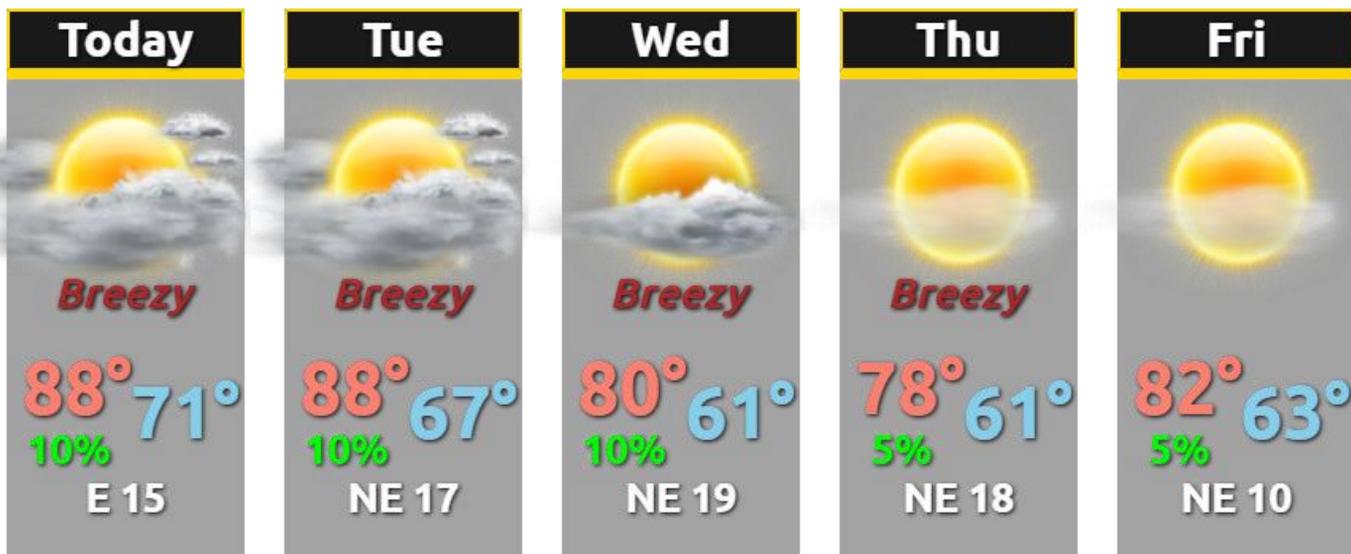

Forecast For: September 16-20, 2019
Time Issued: 10 AM September 16, 2019

Forecaster #: 910-762-4289

A more seasonable airmass arrives mid-week

Overview: High pressure following a cool front will bring more seasonable temperatures and lower humidity beginning Wednesday. Rain chances will remain minimal.

Impacts: Area beaches will have strong rip currents through the middle of the week from Humberto.
